What is NIKI?

A unified item master data and a nomenclature management system **NIKI** (**National Items K Index**) was created to give a better way of analysing items transactions.

After failing to update prices electronically in pharmacies; making an automated orders from a retailer shops to a wholesalers and not being able to give accurate report to its clients; **Algorithm Inc.** has decided to invest in a system able to normalize and standardise items nomenclatures across all businesses running on their nodes.

National Items K-Index started in 2016 and stopped due to the lack of funds and resources. In 2021 Algorithm Inc. decided to resume and finish the project with major players in industry already working on ISHYIGA Systems.

ISHYIGA
SOFTWARE

Welcome to NIKI, Please login to continue.

Username

Password

Sign in

Why NIKI?

- More business using ISHYIGA Software
- Clients' needs growing in accurate reporting
- Need to do electronic orders and prescription on ISHYIGA network
- EBM for all law will rise the use of billing system among businesses
- Pandemic measures (contactless) will promote online orders
- E-payment at 75%
- Traceability, making sure the end user is taking the right item
- Prices management (company with branches, insurance price for retail pharmacies....)

Benefits of NIKI

Control and overview your business easily and accurately

Boost online sales

Reduce error in inventory (possibility of using blockchain)

Use the right tax rate for the right item

Better prices management

Better reports

Introducing Machine Learning, Artificial intelligence,
Internet of Things

Welcome to NIKI 3.1

NIKI Homepage

Accessing NIKI, in this image is the main page encountered with several buttons to help in navigating through this System. Their descriptions are on the next page

NIKI Button Description

 TRANSFORM
(103482)

This shows the Items which need to be validated.

 CATEGORIES
(112)

This shows the items categories and can be used to add on another.

 NIKI REVALIDATE
(0)

This shows the Items which were delete, They can be restored and revalidated.

 NIKI LIST
(0)

This shows the Items which was already validated.

 BUSINESS SECTOR
(31)

This shows the business categories in which the business are registered in.

 PROMOTION
(14)

This shows the type of promotions a business can avail for the customer

 EXPORT EXCEL

This shows the list of validated items with the option of exporting.

 SETTINGS

This gives access to additional information, including reports, tax, price list....
