INTRODUCTION

ISHYIGA KAOS operates through an e-commerce platform, enabling retailers to place orders for products, which are then transmitted to wholesalers responsible for fulfillment. Retailers access the platform to browse products, place orders, and provide shipping information, while wholesalers receive these orders, pick items from inventory, and arrange delivery to the retailer's specified location. Delivery logistics are managed, and tracking information may be communicated back to retailers through the platform. Upon receipt, retailers update their internal systems to reflect incoming inventory, ensuring accurate inventory management. The system integrates seamlessly with internal software, providing reporting and analytics capabilities to track order volumes and improve efficiency throughout the ordering process.

GOALS & OBJECTIVES OF KAOS

Objective n° 1

Efficiency and Simplicity

To streamline the ordering process between retailers and wholesalers, simplifying complex transactions into intuitive steps. By providing retailers with a user-friendly platform to browse products, place orders, and provide shipping information.

Objective n° 2

Accuracy and Transparency

To ensure accuracy and transparency throughout the order fulfillment process. By facilitating real-time transmission of orders from retailers to wholesalers and providing visibility into inventory levels, order statuses, and delivery tracking information

Objective n° 3

Integration and Optimization

Integrate with internal systems, such as inventory management, to optimize data exchange and automate processes. By offering reporting and analytics capabilities, we empower retailers and wholesalers to track order volumes, identify trends, and make informed business decisions

BENEFITS

Efficiency

Streamlines ordering, saving time and effort. a centralized platform for place order, tracking, and communication, the system enabling faster and more seamless transactions.

BENEFIT N°1

Accuracy

Ensures real-time data for reliable transactions. With access to up-to-date data on inventory, order, and delivery tracking, retailers and wholesalers can minimize errors, to provide reliable service to their customers

BENEFIT N°2

Collaboration

Facilitates communication. Common platform for interaction of retailers and wholesalers to share information, activities & and solve issues, leading to stronger and more mutually beneficial relationships

BENEFIT N°3

Inventory Optimization

Enables better management and cost reduction. Access to real-time inventory data and reporting capabilities, retailers and wholesalers can optimize their inventory management practices.

BENEFIT N°3

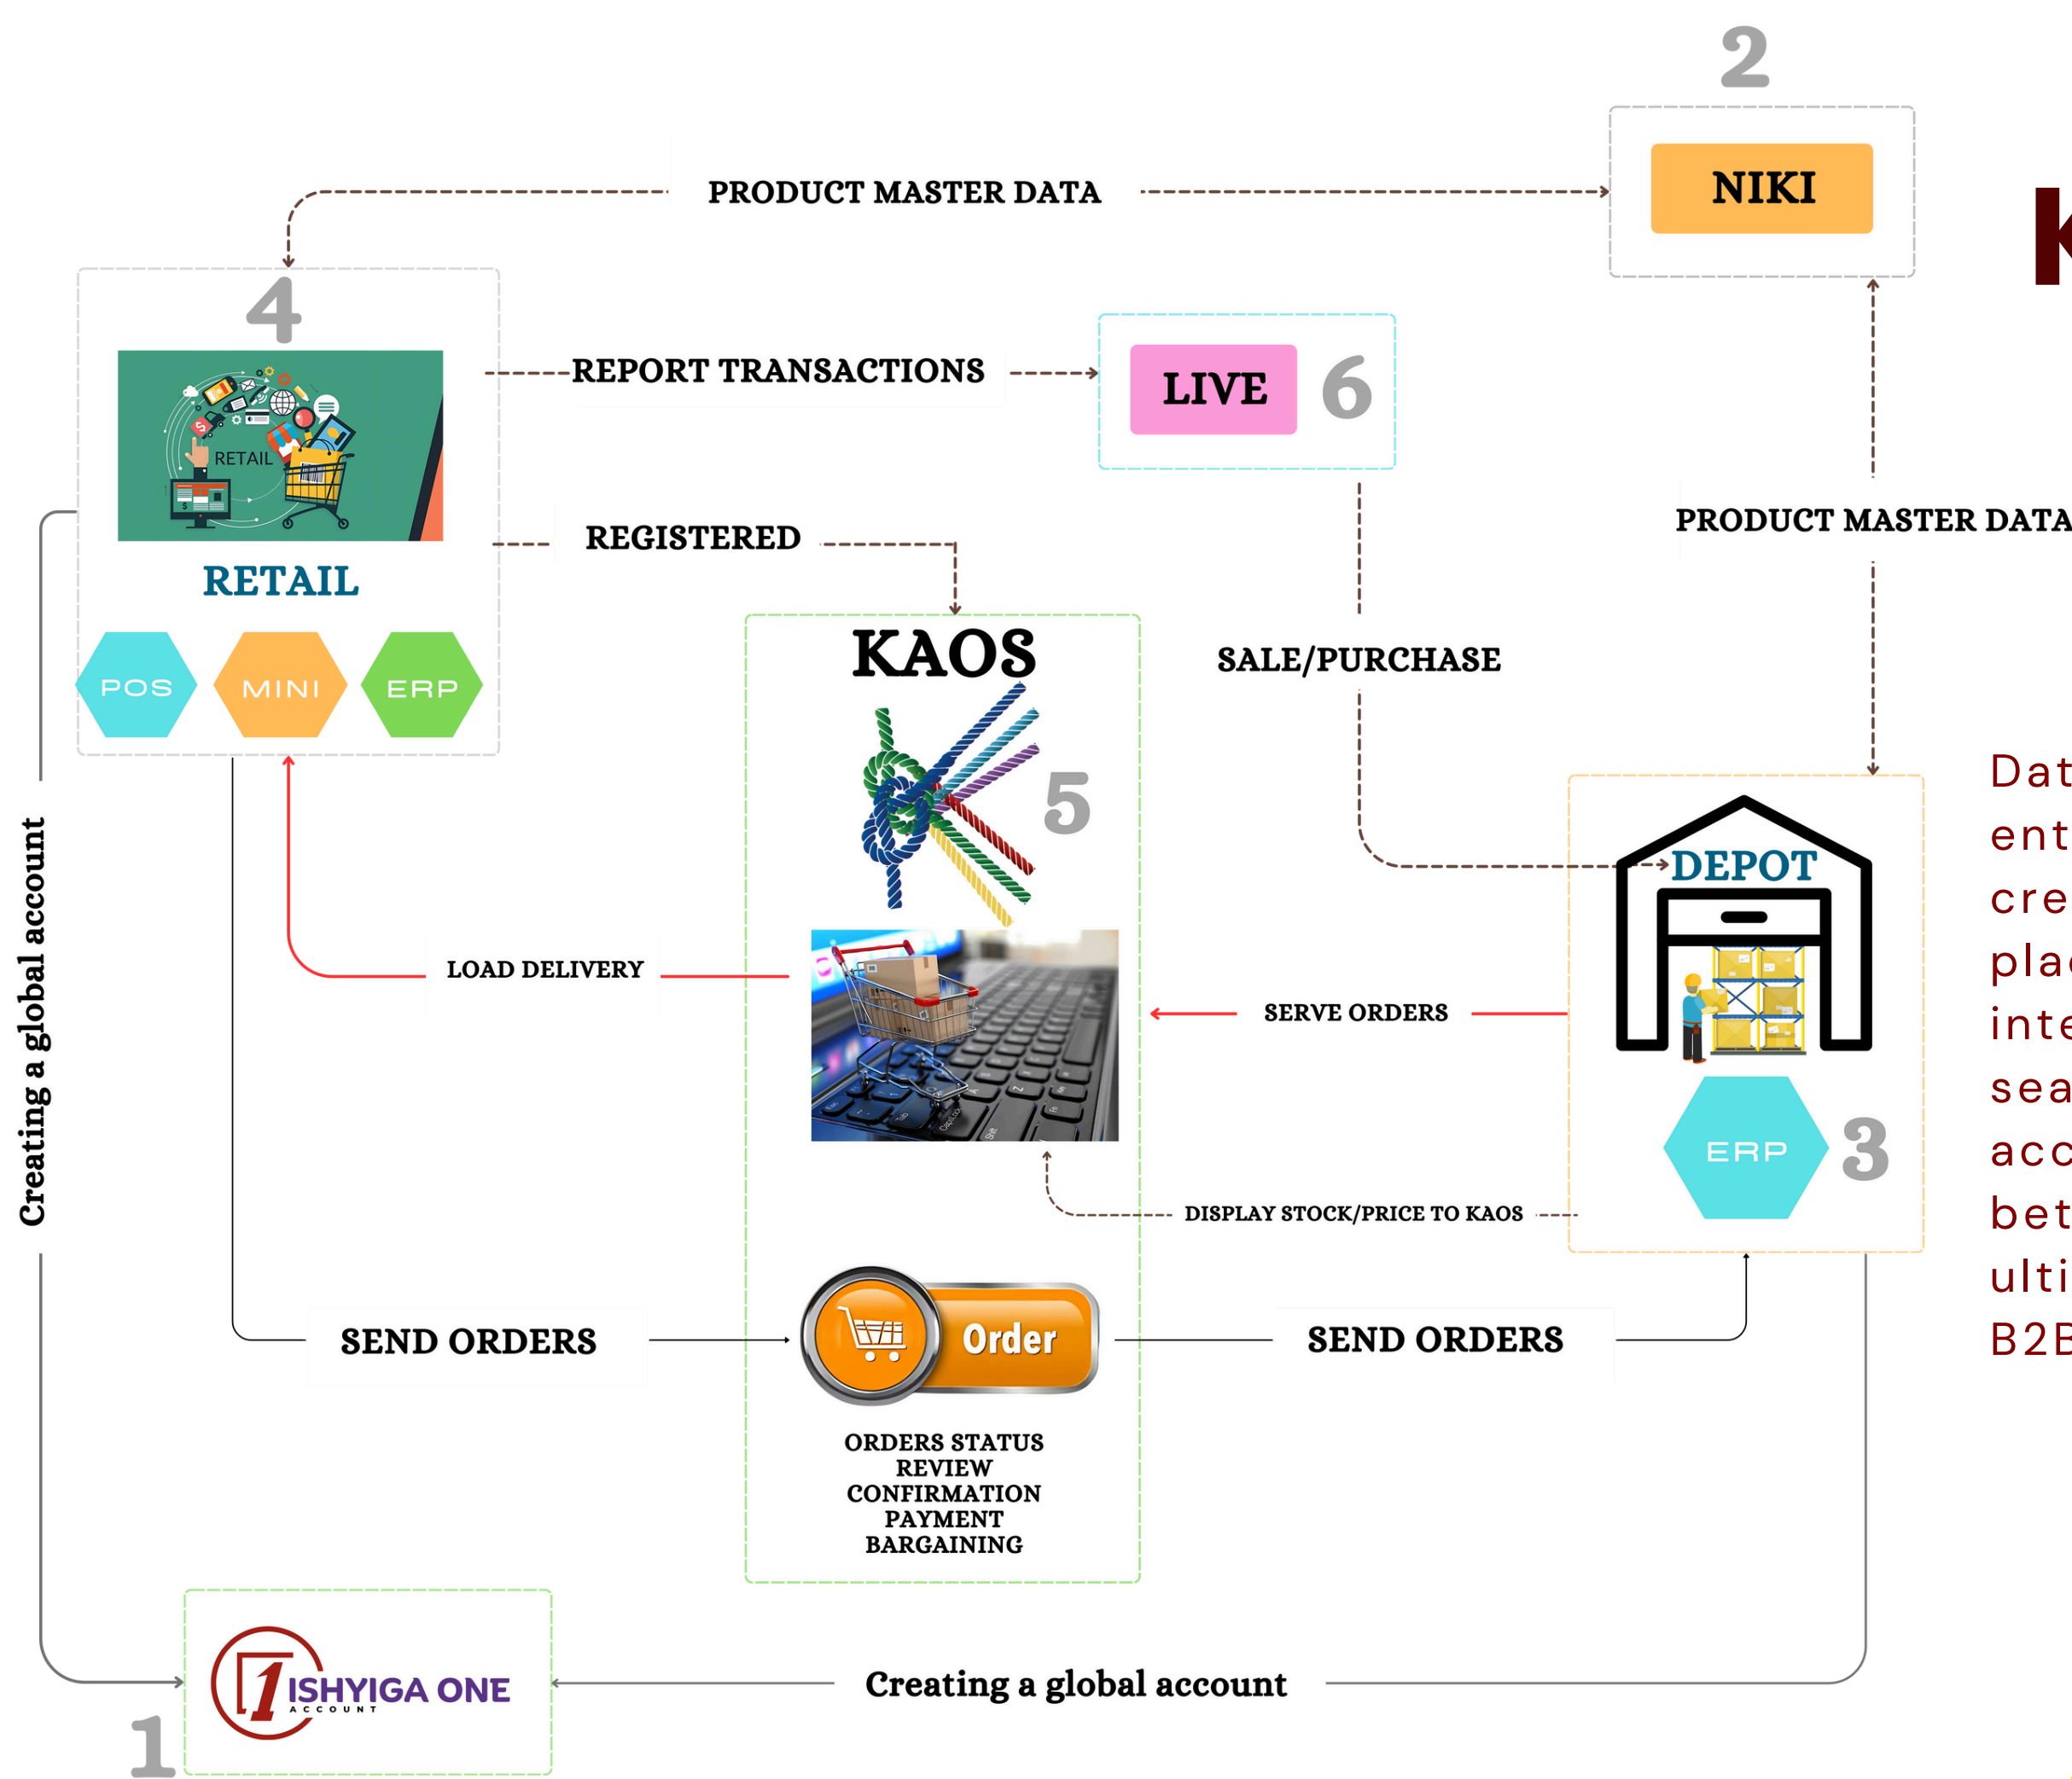

OUR INTEGRATED SOLUTION

ISHYIGA KAOS comprises five essential systems that seamlessly work together across different businesses to streamline B2B transactions. From initial registration and item master data management to wholesaler and retailer order processing, our system ensures smooth operations at every step. With the ability to track orders in real-time and report transactions securely on the cloud, we provide a comprehensive solution that enhances efficiency, accuracy, and collaboration between trading partners.

The System includes:

- **ISHYIGA ONE ACCOUNT** (account creation, registration and system access management)
- **ISHYIGA NIKI** (item master data management)
- **ISHYIGA ERP** (wholesaler order processing)
- **ISHYIGA POS** (retailer order processing)
- **ISHYIGA KAOS** (orders status, review, confirmation, payment, bargaining & rating)
- **ISHYIGA LIVE** (report of transactions securely)

KAOS SYSTEMS FLOW

Data flow of ISHYIGA KAOS encompasses the entire ordering process, from account creation to accessing the system, order placement to fulfillment, delivery, and integration with internal systems. This seamless flow of data ensures efficient, accurate, and transparent transactions between retailers and wholesalers, ultimately contributing to the success of the B2B partnership.

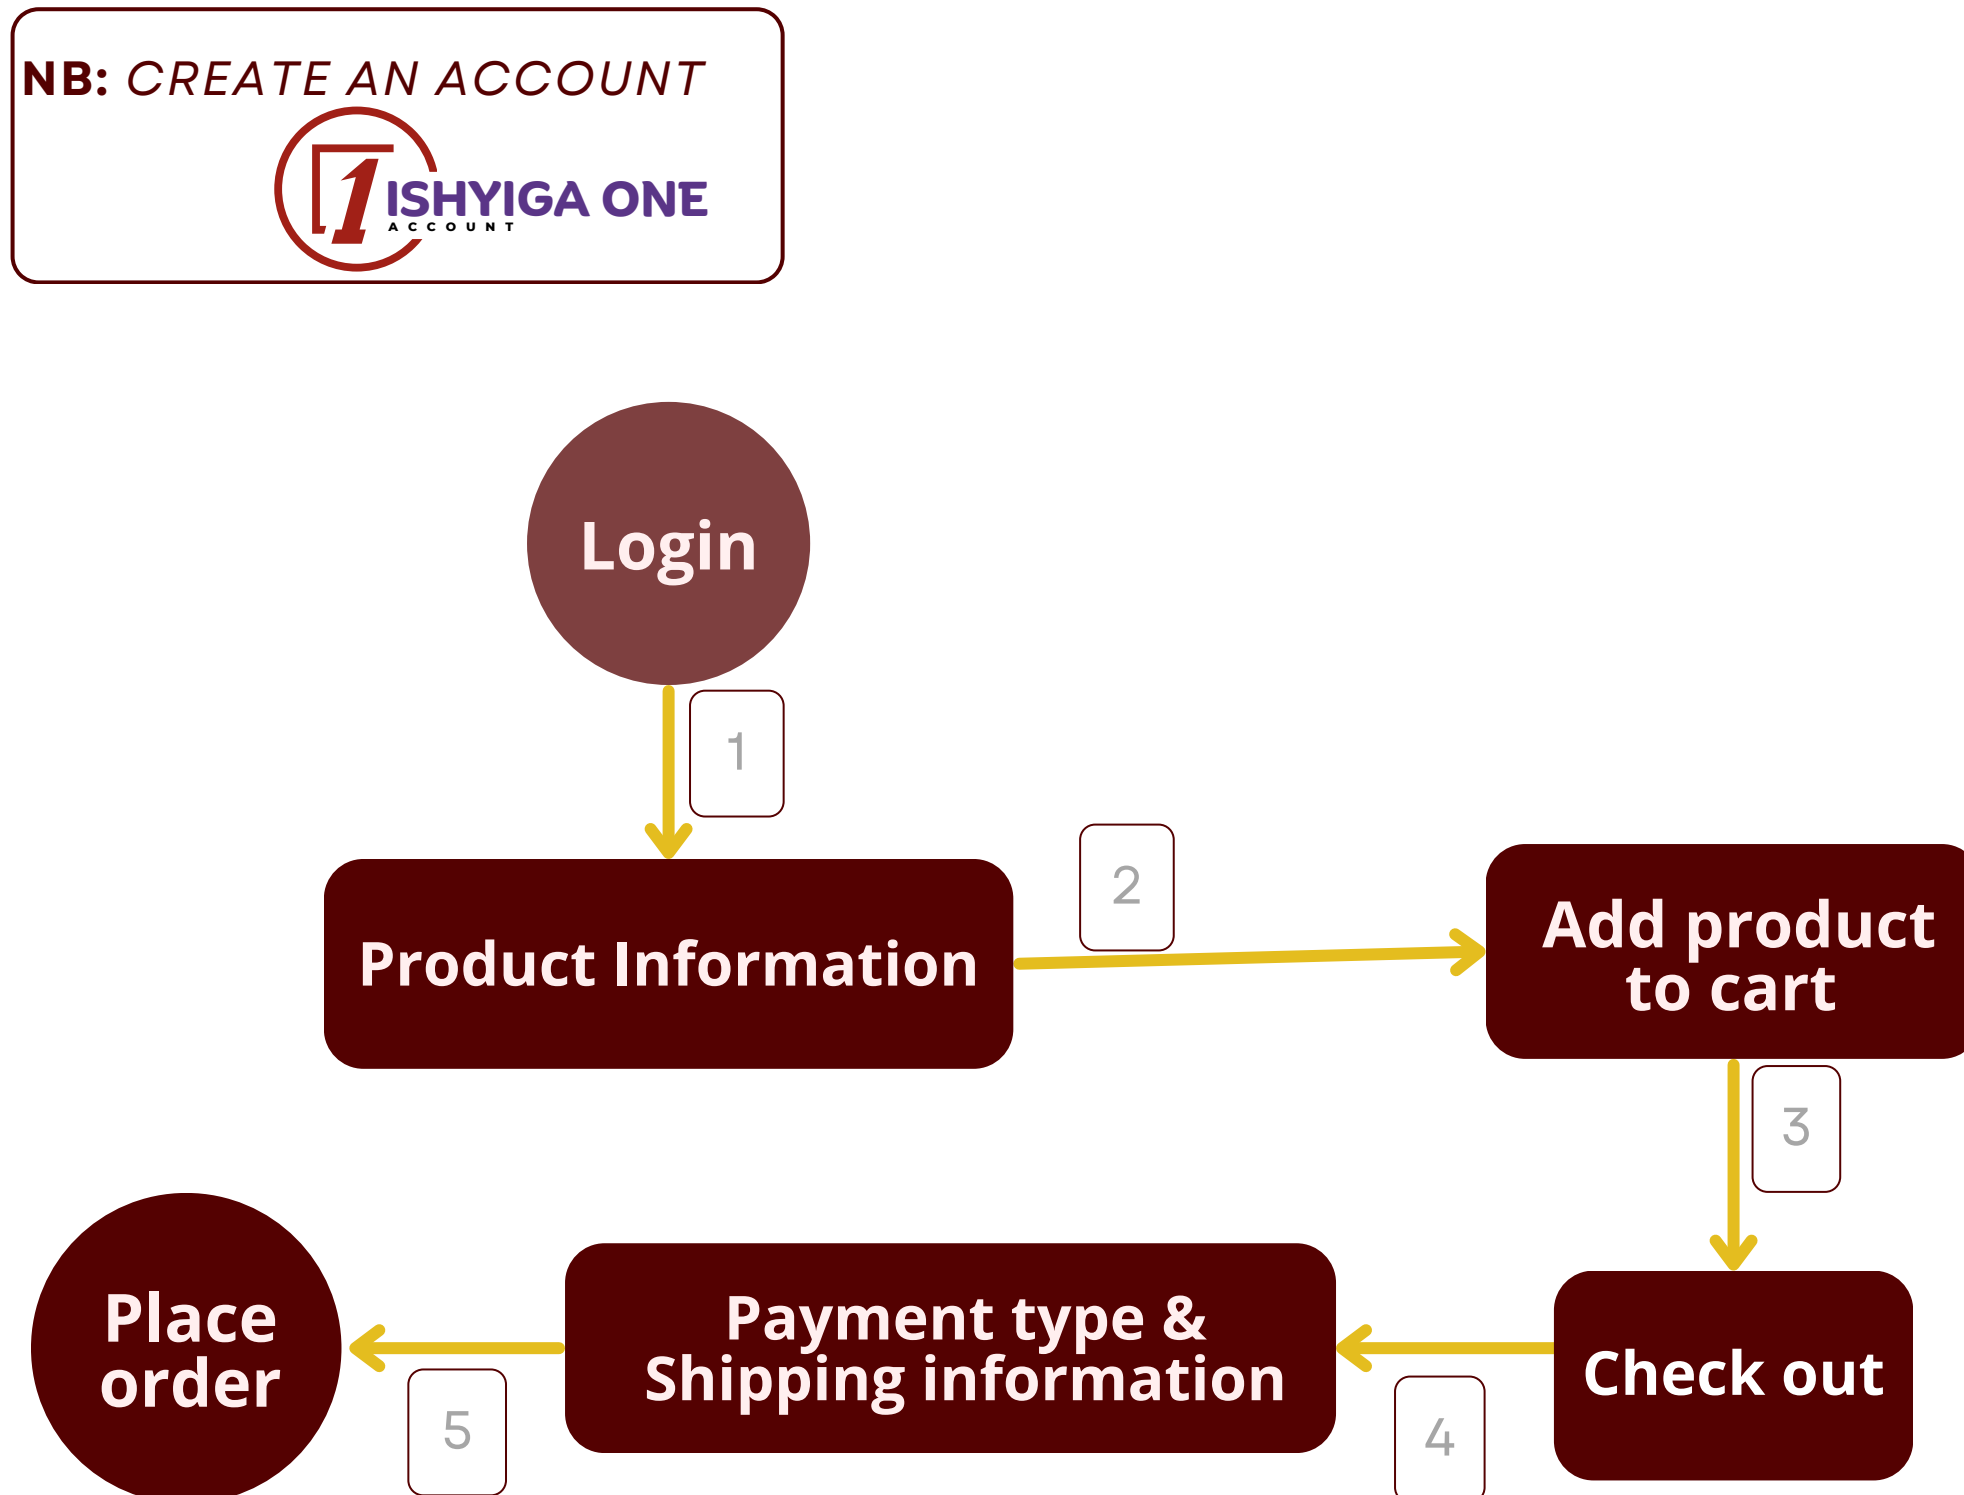

BUYER'S PATH (NON ISHYIGA USER)

B2C (Business-to-Consumer) online order management involves the processes and systems used by businesses to manage and fulfill orders placed by individual consumers through an online platform.

A summary of the steps:

- Create account & Login KAOS
- Search product
- Add to cart
- Checkout
- Payment type & make payment
- Place order

Effective B2C online order management ensures a smooth, efficient, and satisfactory shopping experience for customers, while also optimizing operational efficiency for businesses.

BUYER'S PATH (ISHYIGA USER)

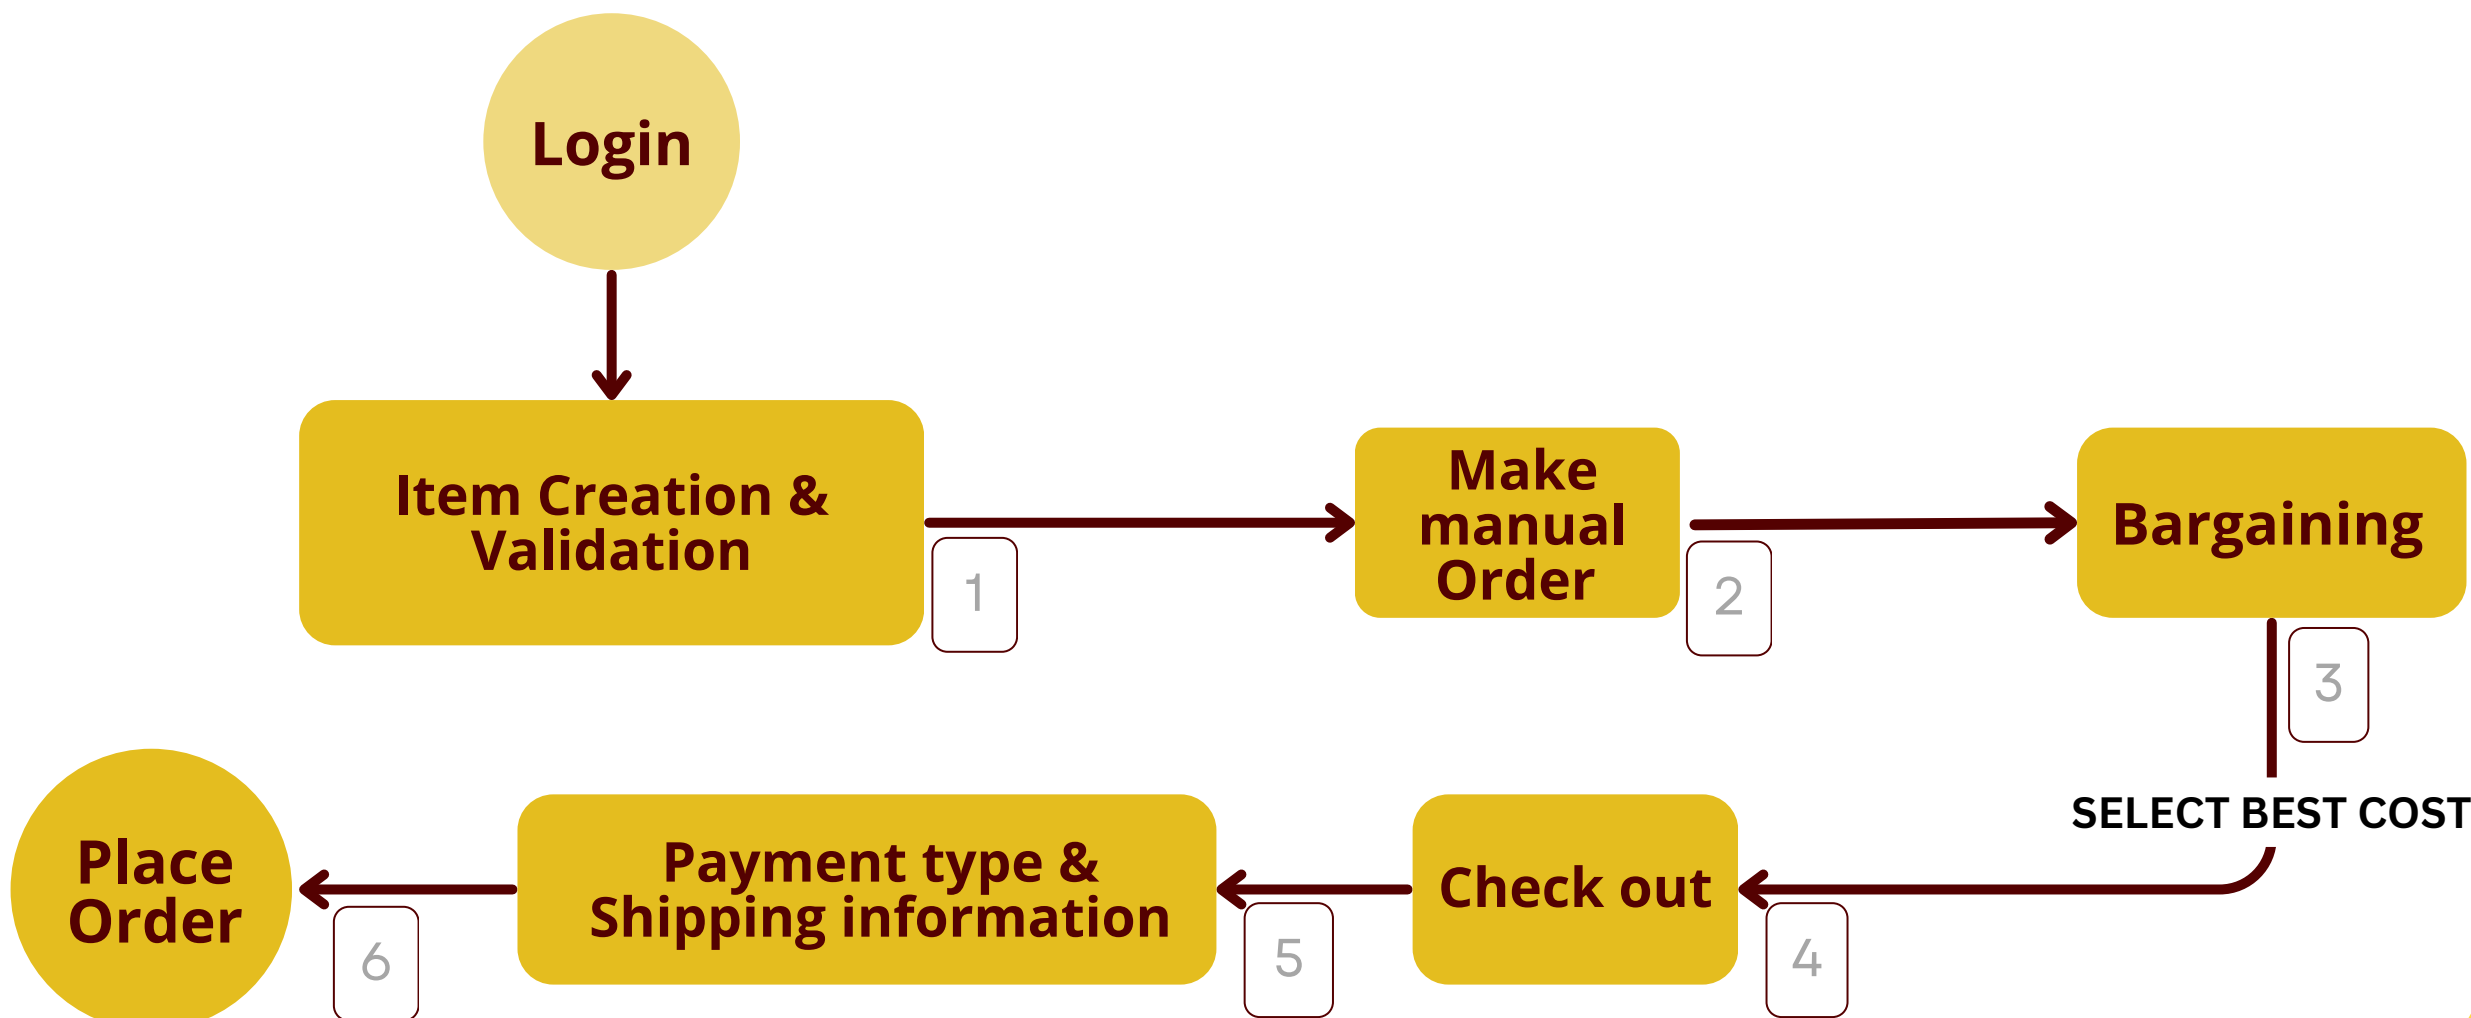

B2B (Business-to-Business) online order management is a systematic approach that businesses use to process and handle orders placed by other businesses through digital platforms. KAOS integrates various functions such as order placement, status and fulfillment. It typically includes a user-friendly online portal where clients can view products, check availability, place orders, and track their status in real-time. Additionally, it incorporates features like automated inventory updates, after serving an order or receiving a delivery. Effective B2B online order management enhances efficiency, reduces errors, improves customer satisfaction

NB: CREATE AN ACCOUNT & WAIT FOR APPROVAL

A summary of the steps:

- Create account
- Item creation and validation
- Pick items in the system and make order
- Login KAOS and check order made
- Bargain products on your order
- Checkout
- Make payment
- Place order

Update stock

Sellers are crucial stakeholders who manage the sales of products via e-commerce platforms. They handle various tasks such as listing products, managing inventory and processing orders. Sellers will utilize KAOS order management systems to streamline these operations, track sales, and maintain customer communications. Effective sellers focus on providing detailed product descriptions, competitive pricing, and excellent customer service to enhance buyer satisfaction and foster loyalty.

A summary of the steps:

- Create account & Login KAOS
- Item creation and validation
- Avail stock on KAOS
- Receive order
- Check & confirm payment
- Serve order
- Update stock
